## ISASI Membership Management - Changes

Dear ESASI Members,

ISASI made the decision at the last International Council Meeting to implement an online application for new members and renewals for our existing members. This is being implemented using a membership management system called **Wild Apricot**. This is an entirely new system for ISASI and while it might require some adjustments, we feel that this is an excellent opportunity for existing and future Society members. We are optimistic that the use of this system will help ISASI (and ESASI) to grow new membership and retain existing members.

By now, you will have received a personal message from the ISASI President stating an implementation date of 8th October 2021 and information related to the renewal process. Further information will follow.

As with any new system, we may experience some bumps along the road. If you have any suggestions for improvement or have issues with the system, please feel free to contact the ISASI Webmaster at [astorey@srca.net](mailto:astorey@srca.net).

Best regards,

Olivier FERRANTE  
ESASI President
